Rdr reported the gelding, which was having its first start, was not suited to the track conditions and held its breath which may have had an affect on its performance. S. Comments:Began awkwardly. When asked about performance, Rdr stated mount travelled only fairly in the early and middle stages-added round home turn, mare took a few awkward strides and for that reason, elected not to pressure mount for the remainder. A post-race vet exam revealed cardiac arrhythmia for the first time. Vet clearance with satisfactory results of an electrocardiography (ECG) prior to a 1000m gallop or trial prior to resuming in a race.

Rdr reported when the pace of race steadied approaching 1100m, mount commenced to over-race, therefore allowed gelding to stride to a leading position, however when placed under pressure in the home straight, failed to respond to riding-added mount would be better suited when allowed to race in a position with cover & with a more genuine tempo.
