When questioned regarding the performance of the gelding, which performed below market expectations, Jockey explained that gelding raced greenly throughout, had to be continually steadied off the heels of runners in front, and when placed under pressure in the straight failed to respond and was disappointing. A post-race veterinary examination revealed that the gelding was lame in the off foreleg. Trainer since reported that gelding underwent surgery to remove bone chips from its off fore knee.

He added that he was then obliged to race in that position throughout and when placed under pressure after straightening for home the mare failed to respond to his riding and was disappointing. S. Comments:Jockey explained that after being momentarily crowded for room shortly after the start, he had to continually ride his mount along in an attempt to obtain the lead, in accordance with its established racing pattern. He said that when unable to do this, his mount was constantly under pressure and never travelled comfortably. Jockey added that in his opinion the gelding performs better in races over a longer distance and when it is able to dictate the terms in front. A post-race veterinary examination of the gelding did not reveal any abnormalities.
